

2010 / 2011

goldcoastrailway.com

NEW FOR 2010 / 2011

#####

Dear TT enthusiasts,

This is our very first full catalog, here you will find our complete range of TT products we have available. Also included are announcements of new products on the way, and an approximate date of availability.

For 2010, we are happy to announce many new versions of the 1937 AAR 40' boxcar, including the very popular Western Pacific "Feather" boxcar, and Southern Pacific "Overnight" black boxcar. Availability for the new boxcars will be in the 3rd and 4th quarter of 2010.

For 2011, we will be releasing our newest project, the 40' steel ice refrigerator car. Keep checking our website for updates including pictures of test shots as they become available.

Our website is www.goldcoastrailway.com and we will be updating it with a new version, that will be launched on June 1st, 2010. If you'd like to see your TT modeling efforts on the website, we are always looking for photos for our gallery, please send them in, either in e-mail, or through the post.

Like to chat about TT ? Or have a question ? Why not check out the all New TT scale chat forum located at www.ttnut.com !

With your help, we hope to continue expanding our North American range of TT products.

Happy Modeling !

#####

ABOUT OUR PRODUCTS

Ready to run : Each model has been carefully researched and accurately reproduced in 1/120 TT scale. Our models are made of injection molded styrene plastic, and include appropriate insulated metal wheels and trucks. Each model is weighted per NMRA recommendations. Each paint scheme has been carefully researched with historical drawings and documents, and has proper road numbers, reporting data, and color. Model comes in clear plastic case with protective blister holder. Also included is a bag of detail parts for the modeler to apply. Coupler choice is left up to the modeler. We can supply most types including Kadee, and Tillig European style couplings.

Assembly kits & Parts : For the modeler who prefers to build his own rolling stock, we offer kit versions of our rolling stock in limited quantities. Easy construction with plastic cement. Each kit includes appropriate insulated metal wheels and trucks. And for the modeler who prefers to scratch build or kit bash with various parts, or just to update older rolling stock, we offer detail parts, wheels, trucks, weights, and body kit parts.
